EDUCATION

APJ Abdul Kalam Kerala Technological University

B.Tech Electronics and Communication Engineering

Kerala, India

2015 – 2019

St. Thomas Higher Secondary School Mayannur

Plus Two Computer Science

Kerala, India

2013 – 2015

PROFESSIONAL SUMMARY

Software Developer with 5+ years of experience in backend and full-stack application development using Java, Spring Boot, REST APIs, React.js, PHP, Laravel and MySQL. Experienced in developing scalable enterprise applications, API integrations, authentication systems, and cloud deployment. Strong understanding of OOP, MVC architecture, microservices concepts, and Agile methodologies.

TECHNICAL SKILLS

Languages: Java, JavaScript, PHP

Frameworks & Libraries: Spring Boot, Spring Security, Hibernate/JPA, React.js, Laravel, jQuery

Databases: MySQL

Cloud & Tools: AWS, Git, Apache, Postman, CPanel

Concepts: OOP, MVC Architecture, SOLID Principles, REST APIs, JWT Authentication, API Security, Third-Party API Integration, CI/CD, Agile/Scrum Methodology, Responsive Design, Database Optimization, Problem Solving, Manual Testing

PROFESSIONAL EXPERIENCE

Software Developer

2025 – Present

Tranetech Software Solutions

Kerala, India

- Wrote clean, maintainable, and optimized code while troubleshooting and debugging complex software issues.
- Performed unit and integration testing and supported deployment activities to ensure stable production releases.
- Maintained detailed documentation of code, APIs, and systems for future reference and smooth team collaboration.
- Collaborated with cross-functional teams to define project timelines, milestones, and technical deliverables.
- Developed and integrated new modules for a property management platform using Laravel and React.

PHP Developer

2024 – 2024

Vandalay Business Solutions Pvt Ltd

Kerala, India

- Developed and maintained web applications using PHP and frameworks such as Laravel.
- Collaborated with distributed teams using Git-based version control workflows on GitHub.
- Integrated third-party APIs, such as payment gateways or social media platforms.

Software Engineer

2022 – 2023

Techversant Infotech Pvt Ltd

Kerala, India

- Wrote clean, maintainable, and optimized code while troubleshooting and debugging complex software issues.
- Conducted unit testing, integration testing, and participated in the deployment process to ensure high-quality software delivery.
- Maintained detailed documentation of code, APIs, and systems for future reference and smooth team collaboration.

Software Engineer

2020 – 2022

DRD Communications and Software Pvt Ltd

Kerala, India

- Assisted in the creation and delivery of internal training programs to enhance the technical skills of the development team.
- Participated in Agile development processes, including sprint planning, daily stand-ups, and retrospectives to ensure timely project delivery.
- Designed and developed RESTful APIs and integrated third-party services to enhance application functionality.

Jr. Software Engineer

Indocosmo Software Pvt Ltd

2019 – 2020

Kerala, India

- Assisted in developing and maintaining backend services, ensuring reliability, performance, and code quality through regular testing and debugging.
- Wrote clean, maintainable, and well-documented code following industry standards and team guidelines.
- Worked closely with senior developers to understand requirements and translate them into functional solutions.

PROJECTS

Equal ERP | *Laravel, MySQL, AWS, React, Git*

- Developed a centralized property management platform for managing properties.
- Created modules for property listing, lease management, rent collection, and maintenance tracking.
- Optimized backend logic and queries for faster data retrieval and report generation.
- Ensured data validation, error handling, and performance optimization throughout the system.

AI Chatbot | *React.js, JavaScript, Git*

- Developed chatbot features supporting file-upload-based queries.
- Implemented speech-to-text functionality for voice-based user interaction.
- Integrated payment gateway functionality for membership subscription plans.

Lead Generation | *Laravel, JavaScript, MySQL, jQuery, AJAX, Postman, Git, React.js, AWS*

- Integrated the third-party API for high-quality VOIP calls.
- Wrote PHPUnit test cases and performed manual testing to ensure application quality and functionality.
- Collaborated with the team to improve VOIP call quality and system reliability.

MS Teams in UBOSS | *Laravel, JavaScript, MySQL, jQuery, AJAX, Postman, Git, React.js, AWS*

- Collected and validated user information for claim processing workflows.
- Sent user information to legal advisors through CakePost integration.
- Implemented automated follow-up email and SMS notification features.

Hikari Chat Application | *Java, MySQL, REST APIs, Git, JavaScript*

- Designed and integrated RESTful APIs for message handling, user communication workflows, and data management functionalities.
- Optimized application performance by debugging critical issues, improving backend logic, and enhancing database query efficiency.
- Collaborated with development teams using Git-based version control and followed Agile development practices for timely feature delivery.
- Performed manual testing, defect tracking, and technical documentation to ensure application stability, scalability, and maintainability.

Employee Management System | *Java, Spring Boot, MySQL, REST APIs, Git*

- Designed and implemented RESTful APIs for employee CRUD operations, authentication, and role-based access management.
- Developed RESTful microservices using Spring Boot, Hibernate/JPA, and MySQL.
- Implemented debugging, validation, exception handling, and performance optimization to improve system reliability and maintainability.
- Used Git for version control and performed API testing using Postman in a collaborative development environment.
- Built backend APIs with Spring Boot and integrated frontend modules.
